**IV SOLUTION KETAMINE CENTERS OF CHICAGO AND KANSAS CITY
HELPS VETERANS WITH PTSD AND OFFERS 30-50% OFF INFUSION TREATMENT**
*Innovative intravenous medical treatment proven effective in
conquering depression, PTSD, anxiety and chronic pain*

CHICAGO, IL/KANSAS CITY, KS (DECEMBER 2018) – Twenty-two American Veterans commit suicide every day. To help combat PTSD and depression, [IV Solution Ketamine Centers of Chicago](http://www.chicagoIVsolution.com) (712 North Dearborn Street) and Kansas City (6500 W 143rd Street in Overland), offer clinically proven intravenous ketamine therapies for the treatment of depression, anxiety, PTSD, OCD, bipolar disorder, chronic pain, and other ailments to veterans 30-50% off of all infusion treatments.

According to the RAND Center for Military Health Policy Research, 20% of veterans that served in either Iraq or Afghanistan suffer from depression or PTSD. Dr. Bal Nandra, Chief Medical Officer at IV Solution, wants to help.

“Our patients have been experiencing outstanding results, and we want more veterans to experience the life-changing aspects of ketamine,” says Nandra who received his training from the University of Chicago Hospitals Department of Anesthesia and Critical Care. “Mental health resources aren’t front and center for veterans, and they are not receiving the treatments they deserve,” adds Nandra. “Alternative therapies like ketamine are key in the quest to de-stigmatize mental illness and we will do everything in our power to spread the word.”

Ketamine was identified as an effective antidepressant more than a decade ago, and continues to gain positive feedback and results from patients and doctors, being hailed as “revolutionary” and “life altering” time and again. IV Solution, Ketamine Centers of Chicago has meticulously assembled a top-notch team of registered nurses with ketamine infusion experience, along with licensed therapists and technicians who care for patients and collaborate with their primary care physician, specialist, or mental health professional to optimize treatment and ensure continuity of care.

As opposed to oral antidepressant medications, which may only be effective in about 60 percent of patients and take up to a month or more to take effect often with undesirable side effects, ketamine is effective within minutes to hours with minimal side effects. After the first series of six 45-minute infusions for depression over a period of two weeks, most patients report immediate relief of symptoms for many weeks to months. In fact, some patients, with the guidance of their physician or mental health professional, may be able to decrease or even eliminate other medications as treatment progresses.

“After being diagnosed with clinical depression at a very young age, I spent most of my life trying to find a depression and anxiety medication that worked for me,” says Chicagoan and patient Jason Prinzo. “While some of the medications brought me relief from my depression, they also came with side effects that were impacting other parts of my life. After reading a lot of information on the results of ketamine treatments I decided to give it a shot. I can’t tell you what a difference it has made in my life! It was a very quick and noticeable change in not only my attitude and overall outlook on life, but it felt great to be excited again to go and do things with my wife and friends. I can’t recommend the folks at IV Solutions and ketamine treatments enough to anyone battling depression and anxiety. Without trying to sound too cliché, it literally changed my life.”

ABOUT IV SOLUTION

IV Solution, Ketamine Centers of Chicago, is the first private facility to offer clinically proven intravenous ketamine therapies for the treatment of depression, chronic pain, fibromyalgia, and other ailments. Located at 712 North Dearborn Street in Downtown Chicago, the state-of-the-art medical facility in River North offers customized therapy in a private, confidential setting with anesthesiologists, registered nurses, and skilled staff onsite.

For more information, the public is invited to call 844-9-IV-MEDS (948-6337), or email info@ChicagoIVSolution.com.
